Boxing

Boxing is the process of packing products into boxes for shipping. It is a critical step in the logistics chain, ensuring that products are protected and organized for transport. The process involves selecting the appropriate box size and type, packing the products securely, and labeling the boxes for identification. The following table provides a detailed overview of the boxing process, including the steps involved and the associated costs.

Step	Description	Cost (USD)
1. Box Selection	Selecting the appropriate box size and type based on the product dimensions and weight.	1.8
2. Packing	Packing the products securely into the box, using appropriate packing materials (e.g., bubble wrap, foam peanuts) to protect the products.	1.9
3. Labeling	Labeling the box with the product name, quantity, and destination.	2.1
4. Sealing	Sealing the box with tape to ensure it is secure.	2.5
5. Stacking	Stacking the boxes in a way that maximizes space and ensures stability.	3.2
6. Shipping	Shipping the boxes to the destination.	6

The total cost of the boxing process is 18.5 USD. This cost is broken down as follows: 1.8 USD for box selection, 1.9 USD for packing, 2.1 USD for labeling, 2.5 USD for sealing, 3.2 USD for stacking, and 6 USD for shipping.

Boxing is a critical step in the logistics chain, ensuring that products are protected and organized for transport.
