

A close-up photograph showing two layers of nonwoven fabric. The top layer is a lighter, smoother material with a scalloped edge. The bottom layer is a darker, more textured material with a visible fibrous structure. The two layers are overlapping, with the scalloped edge of the top layer resting on the textured surface of the bottom layer.

A close-up photograph showing several layers of nonwoven fabric. The top layer is a smooth, light-colored material. Below it, there are several layers of a more fibrous, textured material, likely a filter or separator. The layers are slightly offset, creating a stepped appearance. The background is a dense, fibrous material, possibly the same as the layers shown.
