PP Nonwoven Production Line

JUNQIAN NONWOVEN is a professional manufacturer of nonwoven fabrics, with a production capacity of 58500 tons per year. The company has a complete set of equipment and a professional technical team. The production line is equipped with a high-speed spinning machine, a guide, a winding machine, and a cutting machine. The production line can produce nonwoven fabrics with a width of 1.6M, 1.9M, 2.1M, 2.5M, 3.2M and a weight of 100gsm to 300gsm. The production line can produce nonwoven fabrics with a length of 100m to 500m. The production line can produce nonwoven fabrics with a thickness of 0.1mm to 0.5mm. The production line can produce nonwoven fabrics with a density of 0.05g/cm³ to 0.15g/cm³. The production line can produce nonwoven fabrics with a tensile strength of 10N/5cm to 30N/5cm. The production line can produce nonwoven fabrics with a tear strength of 10N to 30N. The production line can produce nonwoven fabrics with a burst strength of 10N to 30N. The production line can produce nonwoven fabrics with a puncture strength of 10N to 30N. The production line can produce nonwoven fabrics with a compression strength of 10N to 30N. The production line can produce nonwoven fabrics with a bending strength of 10N to 30N. The production line can produce nonwoven fabrics with a twisting strength of 10N to 30N. The production line can produce nonwoven fabrics with a stretching strength of 10N to 30N. The production line can produce nonwoven fabrics with a shrinking strength of 10N to 30N. The production line can produce nonwoven fabrics with a wrinkling strength of 10N to 30N. The production line can produce nonwoven fabrics with a creasing strength of 10N to 30N. The production line can produce nonwoven fabrics with a folding strength of 10N to 30N. The production line can produce nonwoven fabrics with a rolling strength of 10N to 30N. The production line can produce nonwoven fabrics with a twisting strength of 10N to 30N. The production line can produce nonwoven fabrics with a stretching strength of 10N to 30N. The production line can produce nonwoven fabrics with a shrinking strength of 10N to 30N. The production line can produce nonwoven fabrics with a wrinkling strength of 10N to 30N. The production line can produce nonwoven fabrics with a creasing strength of 10N to 30N. The production line can produce nonwoven fabrics with a folding strength of 10N to 30N. The production line can produce nonwoven fabrics with a rolling strength of 10N to 30N.

PP Nonwoven is a type of nonwoven fabric made of polypropylene (PP) fibers. It is a lightweight, flexible, and durable material that is used in a wide range of applications, including medical, industrial, and consumer products. The production process involves spinning PP fibers into a nonwoven fabric, which is then finished with various treatments to enhance its properties.

The production line is designed to produce nonwoven fabrics with a wide range of properties, including high tensile strength, high tear strength, high burst strength, high puncture strength, high compression strength, high bending strength, high twisting strength, high stretching strength, high shrinking strength, high wrinkling strength, high creasing strength, and high folding strength.
