

Table 1: Requirements for the production of the product

Raw materials	Raw materials must be of high quality and free from contaminants
Process parameters	Temperature, time, PVA content
Quality control	Regular testing of the product
Equipment	Specialized equipment for the production process
Personnel	Trained personnel for the production process
Production environment	Clean, controlled environment for the production process
Production capacity	15GSM, 17GSM, 21GSM, 25GSM (11GSM-122GSM)
Production speed	1800mm/min
Production cost	1. High quality raw materials; 2. Specialized equipment; 3. Trained personnel, clean environment, regular testing
Production safety	Proper safety measures, PPE, etc.
